Safety is becoming a bone of contention between the Department of Mineral Resources and the industry. On the 25 January a statement was issued out by the department stating how the industry cheapens the lives of mineworkers. As we move onto 2017, Wesizwe is working hard to build a safety culture, not only as a means to preserve licenses to operate but as a show of respect for its employees.

I would like to assure all our stakeholders that strategies and policies are put in place to guide the company and its employees towards developing a safety conscious environment for all employees and contractors. As the mine moves towards the commissioning of the Phase 1 of the project, we will work towards ensuring that the government regulatory frameworks are adhered to.

The Mining Indaba taking place in Cape Town on the 06 – 09 February presents an opportunity for the mining industry to regroup and reflect on the challenges of the past year. For Wesizwe this will also provide an opportunity to position the brand and get the investors talking about the BPM project, and the milestones achieved in 2016.

As always, we hope you enjoy reading the edition of Investor news and we look forward to keeping you updated on all the latest project developments.

BPM Project Update

Main shaft steelwork

50 ML reservoir

“By Means
Of Water,
We Give
Life To Everything.”

Mining utilizes large amounts of water and no mine can operate without water. This poses a bit of challenges for most mining companies as the country is generally battling drought and water shortages. It then becomes imperative for mining companies to find means to preserve water.

One of the key activities for 2016 for BPM was to complete the switchover from a temporary water supply to the permanent supply from Magalies Water. During the year, the mine completed and commissioned two 3 ML dams situated on the mine premises which supply water to the mine.

The dams are currently being used as a storage and supply point. Another portion of the water project was the completion of the 1C pipeline and the 50 ML reservoir located near Mafenyha as part of the water utility company's expansion project.

Both the projects on the 1C extension and the 50 ML reservoir have been completed and commissioned and the mine is able to draw supply through the infrastructure funded by Maseve Mine and BPM.

This infrastructure is to be used to supply water to the mine up to 13ml per day of fresh feed and to the surrounding communities as well. This is another form of benefit to the community, aimed at building good stakeholder relations between the mine and its host community.

The Bakubung Platinum Mine project as at December 2016

Wesizwe donates school shoes for needy learners

The lack of resources is not a mere saying in some communities, this could be evidenced by school pupils going to school on barefoot. For some families it is difficult to afford a pair of shoes. The Ledig community is not immune to this scourge, primary schools especially, see a sizable number of pupils going to school on barefoot.

The Stakeholder Relations office engaged with the schools to understand fully the challenges faced by learners and the lack of school shoes came on top of the list. The traditional office on being informed of the process followed by Wesizwe to determine that particular need in the community, gave the initiative their blessing.

The engagement with the schools revealed that about 895 learners are in desperate need for shoes for this year - 2017. They are from Ratheo Primary School, Mphuphuthu Primary School, Bakubung Primary School, Tshose Primary School, Bakgofa Primary School and Mperebere Primary School.

895 learners with different shoe sizes were identified as being in need of the shoes and Wesizwe made a contribution of R210 000 towards the purchase of the shoes. The presentation of these shoes was staged on the 13th January 2017 at Ratheo Primary School. The event was graced by Kgosi Solomon Mphuphuthu Monnakgotla and the Tribal Authority.

The gesture was highly appreciated by the Department of Education Area Manager the manager further alluded that the Department always values and welcomes good endeavors undertaken by the mine and he went on to urge Wesizwe's BPM to continue with the collaboration.

Rrangwane Mokhukhu Monnakgotla also appreciated Wesizwe Platinum's gesture. He encouraged the pupils, reiterating the importance of education and that learners should feel comfortable to approach educators/tribal authority or different stakeholders should they need assistance. He mentioned that collaborations such as this one should be maintained and sustained with the purpose to better the community. "Wear your shoes with pride and forever be thankful to Wesizwe Platinum Mine – Bakubung Platinum Mine for the aid received today", he said.

Wesizwe Platinum – Bakubung Platinum Mine, Department of Education and Bakubung Ba Ratheo Traditional Leadership handed the shoes over to the excited recipient.

BPM project safety stats – December 2016

The project has worked 1089 154 shifts to date. The current LTIFR is 0.50 for 2016 YTD against a target rate of 1.04.
