("Wesizwe" or the "Company")

**UPDATE ON PRODUCTION STRATEGY: BAKUBUNG PLATINUM MINE
CONCENTRATOR PLANT**

Shareholders are referred to the various announcements released on the Johannesburg Stock Exchange News Service, the last of which was published on 30 March 2026 ("March Announcement") relating to the revised production strategy for the Bakubung Platinum Mine ("BPM"), which entails a single-stage ramp-up to 3.5 million tonnes per annum ("Mtpa").

In alignment with this strategy, the Company advises that the BPM concentrator plant has been placed on care and maintenance while the Company prioritises underground infrastructure development and completion of the Optimization Study referred to in the March Announcement.

The decision aligns processing activities with the timing of underground stoping and the availability of sufficient sustainable ore feed. Appropriate maintenance and preservation activities will continue during this period to safeguard the plant and associated infrastructure. The timing of the plant's recommissioning will be informed by the progress of underground development and the outcome of the Optimization Study.

The Company will continue to keep shareholders informed of all material developments.
